

# Preston Doris

## Web Developer

Seasoned production manager with 4+ years of production management and leadership experience with 2 years of experience independently building websites. Skilled problem solver and critical thinker while self-starting personal growth by taking online web development/software engineering courses through Udacity and Udemy.

## Projects

### Resume/CV Website – [GitHub]

- Responsive website built using HTML5, CSS3, JavaScript
- Built from the ground up to showcase my Front End abilities

### RGB Color Game – [GitHub]

- The RGB color code is listed and the user must pick from a group of 3 or 6 colors that match the RGB code.
- Expert mode displays a Hex color code and the user chooses the color to match that code.

### Weather App – [GitHub]

- Simple/responsive web app leveraging an API integration from Open Weather Map
- Built with PHP to deliver current temperature, highs and lows, and forecast for the day

### Movie Trailer Website – [GitHub]

- Movie Database showcasing the movie in a grid-based layout that is fully responsive.
- Movie trailer opens in a Lightbox when the movie tile is clicked.

## Experience

### Web Developer

**Independent:** 2015 to Present

- Building a beer brewing Web App that leverags a unique formula for recipe development to consistently create/adjust recipes
- Initiated personal growth in web development/software engineering through Udacity and Udemy

### 21<sup>st</sup> Amendment Brewery

**Production Manager:** 11/2016 to Present – San Leandro, CA

- Plan/forecast production needs leveraging an algorithm-based model I developed
- Coach/maintain a 10 person team through collaborative relationships and career developing mentorship
- Manage all beer production, packaging, and shipping from two production facilities on opposite sides of the country through 12% growth compared to an industry growth at 5%
- Track/maintain daily, weekly, and monthly inventories of raw materials, packaging materials, and finished beer for two production facilities

**Head Brewer:** 12/2015 to 11/2016 – San Leandro, CA

- Developed an Excel-based Application to accurately calculate beer recipes in a production environment taking into account variations in raw materials that occur from supplier to supplier

**Brewery Operations Supervisor:** 1/2015 to 12/2015 – Oakland, CA

- Managed 100% of all production at our off-site Partner Brewery through 30% growth while being responsible for all shipping logistics for the company

**Brewery Production Assistant:** 4/2013 to 1/2015 – Oakland, CA

- Developed multiple Excel algorithms to display specific trends in production and shipping
- Managed all shipping logistics for the company and assisted the Production Manager with overseeing production from our Partner Brewery

## Education

### Udacity

Full Stack Web Developer Nanodegree  
11/2017 - Present

### Udemy
